Swimming Policy

Safe Practice in Swimming Guidelines

Based on WCC 2009 Document

Adopted by Governing Body: 08.12.15
Reviewed by Governing Body: 19.04.16
Date of next review: April 2017
Statutory Policy: No

N.B The NOP, the EAP and the Risk Assessment should be reviewed at the same time.

SAFE PRACTICE IN SWIMMING

This amended Worcestershire County Council document represents the Authority’s policy and guidance on swimming for schools and other Children’s Services establishments. Whilst it will require local interpretation and adaptation to individual circumstances, care must be taken to ensure that these remain consistent with the overall policy and guidance set out in this document.
1. INTRODUCTION

1.1 Swimming is an important life skill. It is also a highly beneficial activity for acquiring an increased movement vocabulary. In addition it provides skills for health and enjoyment, and gives access to many other water-based recreational activities. It is one of the few activities that people can enjoy all their life either on their own or with friends and family of the same or different ages, whether just for fun or competitively. We owe it to our youngsters to give them the best chance to learn to swim, as proficiently and as early as possible.

1.2 Nonetheless, it is a recreational and teaching activity which also carries with it the evident hazards of death through drowning or injury by brain damage through near drowning. The teaching and learning of swimming and water safety therefore requires the utmost care on the part of all concerned.

1.3 The purpose of this document is to provide guidance on safe practice in swimming, whether at a school pool, hydrotherapy pool or public pool.

1.4 Each school whose pupils take part in swimming has a responsibility to ensure that it takes action to safeguard staff and pupils. It should be aware of:

- the Normal Operating Procedure (NOP)
- the Emergency Action Plan (EAP)
- conditions of hire
- pool rules
- any special needs or medical conditions of pupils.

1.5 This document sets out the policies and procedures of Worcestershire County Council in relation to swimming pool safety. The Appendices contain model procedures and forms for those schools which have their own pools. These must be made specific to each pool.

1.6 References

2. RESPONSIBILITIES

2.1 Overall County Council Responsibility
Worcestershire County Council has responsibility for ensuring safety in swimming in schools, units and centres where it is the employer. As part of this responsibility the County Council provides the safety policy, guidance and procedures for swimming, and ensures that its employees receive any necessary training to carry out their delegated tasks. In Academy, Foundation and Voluntary Aided schools the Governing Body holds this responsibility, but the Local Authority will act as their agent where their health and safety services have been purchased as part of a service level agreement.

2.2 School, Unit or Centre Responsibility
Every Headteacher or manager should ensure that a nominated member of staff is delegated the responsibility of swimming co-ordinator to apply the swimming safety policy and procedures for their establishment. At Pitcheroak School this person is Michael Wright. This will include the proper operation of the establishment’s own swimming facility or use of a hired pool. It also includes monitoring and recording of:
- appropriate risk assessments
- pool safety operation procedures (NOP and EAP)
- qualifications and training of staff and maintaining records of training
- any instructions issued to staff
- conditions of hire or arrangements for use of the pool for the pool and sessions used.

2.3 Teaching Staff
Teachers have a duty of care that operates for any activity in which children are involved; they cannot transfer that duty of care to anyone else. The law has described this as equivalent to the standard expected of a reasonable and careful parent. This applies to all activities within the school curriculum and to extra-curricular activities organised by the school during and outside school hours, whether on or off the school site.
In relation to swimming this means that:
- children are appropriately supervised when changing
- pupils are under control at all times
- a headcount is taken before, during and after sessions
- normal operating and emergency procedures are enforced
- teachers have an overview of the teaching of children and the conduct of the class.

Primary school teachers should accompany their own class to swimming whenever possible, because of the special knowledge they have of their pupils.

In small shallow school learner pools (1.0 metre deep or less) it may not be practical to have a swimming instructor. In these circumstances the class teacher may need to take on the responsibilities of the swimming instructor (see 2.4).
2.4 Adults Other than Teachers (AOTTs)

2.4.1 Swimming instructors
Swimming instructors will hold a relevant national teaching qualification (see section 6) and may be employed by a school to teach in their own pool or in a public pool. They have responsibility for ensuring the safe conduct of the class in the water and on the poolside, in line with good practice and their training, which includes:
- being familiar with the Normal Operating Procedure (NOP) and Emergency Action Plan (EAP) for the pool and the emergency equipment provided
- running emergency drills every term with each class taught
- working with the lifeguards on duty or, if there are no lifeguards, providing lifesaving and first aid skills on their own or with others
- entering the water and effecting a rescue if necessary and in co-operation with the visiting school’s swimming co-ordinators:
  - planning, developing and monitoring the swimming programme
  - preparing schemes of work appropriate to pupils’ ages, abilities and interests
  - identifying specific groups for each swimming session
  - helping the class teacher to check pupil numbers before, during and after sessions.
They must be vetted by DBS to work with children.

**A member of school staff must always be in charge and present when children are being taught swimming.** This responsible member of staff will maintain their duty of care for the children and any other staff or volunteers assisting.

2.4.2 Other adults (TAs, volunteers etc.)
Other adults can be extremely helpful and may be absolutely essential, to support the delivery of swimming in the PE curriculum and in the extended curriculum, whether on or off site. Teachers cannot transfer their duty of care to these other adults, but where they have experience in the teaching of swimming they may be involved in it. They can:
- supervise changing
- administer first aid
- look after any children who are not swimming or who are unwell.
Additionally, those who have the necessary experience, expertise or qualifications to teach swimming may replace a teacher who does not. However the Headteacher must be aware that they hold the responsibility for ensuring that they are competent. The pool environment is more isolated than a classroom where they can more easily call upon qualified teacher support if required. Because the teaching of swimming and supervision of changing involves significant contact with children, all adults should be DBS checked.
2.5 Lifeguards
Pool operators have a responsibility for the safety of all who use their pools. Whenever children swim, there must be someone present with appropriate life guarding, rescue and first aid skills (see Section 5).

<table>
<thead>
<tr>
<th>Purpose of Lifeguarding</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>in a school pool (depth more than 1.0m)</td>
<td>this must be a teacher, a swimming instructor or an AOTT</td>
</tr>
<tr>
<td>in a public pool</td>
<td>this must be a qualified pool lifeguard or an AOTT with the same qualification</td>
</tr>
<tr>
<td>in a private pool</td>
<td>this must be a qualified lifeguard, a teacher, a swimming teacher or an AOTT</td>
</tr>
<tr>
<td>hydrotherapy pool</td>
<td>this must be specialist staff (e.g. a physiotherapist), a teacher, a swimming teacher or an AOTT</td>
</tr>
<tr>
<td>in a learner pool (depth less than 1.0m)</td>
<td>this must be a teacher, swimming instructor or an AOTT with a minimum of First Aid at Work qualification.</td>
</tr>
</tbody>
</table>

Whoever it is, the person responsible for lifeguarding, rescue and first aid will:
- be familiar with the pool NOP and EAP
- maintain constant observation of the pool and pool users
- carry out rescues and initiate any other emergency action required
- be able to effect a rescue from the bottom of the deepest part of the pool
- administer first aid
- prevent unsafe activities
- ensure that the pool is never left unsupervised whilst in use
- assist in the running of emergency drills
- secure the pool against unauthorised access when not in use
- communicate with children and/or teaching staff to achieve the above

Lifeguards must work with class teachers and teachers of swimming. Lifeguard instructions for safe conduct in the pool should be followed at all times.

N.B. A teacher of swimming who is also responsible for life guarding must never work alone. Another person should assist with teaching a group of children or assist the teacher with a rescue and first aid, as well as looking after the rest of the children, in the event of the teacher having to effect a rescue.
3. STAFF TO PUPIL RATIOS

3.1 Each pool will have a designated maximum bather capacity appropriate to the size of the pool which should be specified in the Normal Operating Procedure.

3.2 There must always be at least one adult, in addition to a lifeguard, present on the poolside. Staff should carry out and record a thorough risk assessment to help determine pupil: staff ratios. The following ratios are based upon safety considerations rather than teaching requirements:

**Recommendations**

**Adult and baby groups: 12 pairs:1**
One teacher to twelve pairs of adults and babies/toddlers under the age of four.

**Non-swimmers and beginners: 12:1**
Young children, normally primary school age, or adults being introduced to swimming who are unable to swim 10 metres unaided on back and front.

**Improving swimmers: 20:1**
Swimmers of a similar ability to each other who can swim at least 10 metres competently and unaided on their back and on their front. It is recommended that the lesson be confined to an area in which the children are not out of their depth.

**Mixed ability groups: 20:1**
Pupils with a range of ability (from improving to competent) where the least able and least confident are working well within their depth. Swimmers’ techniques, stamina and deep water experience should be considered.

**Competent swimmers: 20:1**
Those swimmers who can swim at least 25 metres competently and unaided on front and back, and can tread water for two minutes.

**Competitive swimmers: 30:1**
Training only with very competent swimmers.

**Specialist swimming activities: various**
For more information about the appropriate ratios for specialist activities refer to the ASA at Harold Fern House, Derby Square, Loughborough 01509 618700 or refer to the ISRM publication “Safe Supervision”.

**Swimmers with disabilities: 1:1 – 8:1** (with an appropriate number of helpers)
Each situation must be considered individually as people with disabilities are not a homogeneous group. Care must be taken to ensure that there are sufficient helpers in the water to provide a 1:1 ratio for those needing constant support and a sufficient number of other helpers to provide the degree of support required by the range of disabilities within the group. There are national organisations for specific disabilities from which further guidance may be obtained. Individual risk assessments must be undertaken so that the teacher in charge of swimmers with disabilities can be aware of the particular needs of each child.

The Disability Discrimination Act ensures that disabled persons may not be treated less well than any other person. Policies and procedures or physical changes to the environment may need to be put in place for children with disabilities to swim.
4. SUPERVISION OF CHANGING ROOMS

4.1 Children should be supervised whilst changing.
- If children are using a mixed sex changing area with cubicles then a member of staff of either gender may supervise.
- If using open-plan single-sex changing areas then only staff of the appropriate gender should enter the changing room, unless in an emergency.
- If younger children are swimming, a mixed gender group may use an open-plan single-sex changing room, if schools do not have the staff (teachers and/or AOTTs) of the appropriate number or gender to supervise children in their own-sex changing room. In a public pool this will need to be notified to, and approved by, the pool management.

4.2 Where school parties have sole use of a changing room, school staff sometimes have to operate a remote supervision procedure when gender balance is not appropriate. This can only happen where the children are responsible enough and mature enough to take on significant personal responsibility whilst changing. In order to protect themselves, two members of staff should operate together when controlling by voice through doorways, or entering changing areas in an emergency.

4.3 In Public Pools
It is not desirable for members of the public to share changing provision with school pupils. Pool operators should be asked, wherever possible, to make arrangements for schools to have sole use of changing rooms. Where this cannot be achieved appropriate supervision arrangements need to be agreed between the pool and school. Schools should consider cancelling contracts and seek alternative facilities if the pool management is not amenable to such arrangements.

Where changing takes place in open plan public single sex changing rooms and the school is unable to provide staff of each gender, a specific arrangement must be made with the pool management to provide a suitable member of staff to patrol the changing area whilst children are present. This member of staff must have child protection training. To ensure that the allocated member of staff is not left alone with a single child, all children must wait until everyone is together before moving off. All staff used to supervise changing rooms must be DBS vetted.

4.4 In School Pools
Children will be able to change without members of the public being present. Arrangements for the supervision of children should be as in paragraph 4.1 and 4.2 above.
5. LIFEGUARD PROVISION AND QUALIFICATIONS
Someone must always have specific responsibility for lifeguarding/rescue and resuscitation, and must be suitably trained and qualified in accordance with the circumstances applying.

5.1 In a Public or School Pool with Deep Water (greater than 1.0 metre deep)

5.1.1 Programmed session
Where lifeguards are present and responsible for supervising the safety of the children being taught, teaching staff and AOTTs will not be required to have rescue skills but should understand the basics of teaching swimming.

Minimum Qualification for Lifeguards: Royal Life Saving Society (RLSS)
National Rescue Award for Swimming Teachers and Coaches

5.1.2 Un-programmed session
In un-programmed sessions (recreational swimming – such as an end-of-term fun session or PTA use in evenings or at weekends) the unpredictable nature of children’s behaviour will be such that a higher lifeguarding standard will be required, as per normal public swimming supervision.

Minimum Qualification: RLSS National Pool Lifeguard Qualification (NPLQ)
Un-programmed sessions should not be run unless an NPLQ lifeguard is in place, supported by teaching staff working as part of a lifeguard team to supervise predetermined zoned areas in line with the NOP for the pool. School staff and AOTTs should work under the direction of the qualified pool lifeguard staff.

5.1.3 Mixed programmed and un-programmed sessions
Where the pool is in shared use and clearly divided between programmed and unprogrammed swimming activities, suitably qualified staff may provide both the teaching and lifeguard cover – but only for the programmed area of the pool.

Minimum Qualification: RLSS National Rescue Award for Swimming Teachers and Coaches
Where shared use is not in defined areas then the standard of lifeguarding provision should be as for an un-programmed session.

Minimum Qualification: RLSS National Pool Lifeguard Qualification

5.2 In Shallow Water Learner Pools (less than 1.0 metre deep)

5.2.1 Programmed session
In programmed sessions (such as teaching, coaching and other tuition) the degree of control inherently in place is likely to reduce the risks and this safety cover may be provided by a swimming instructor or member of staff provided they have appropriate qualifications to teach, apply first aid, effect a rescue and have appropriate support for the number of pupils being taught. Staff should not work on their own in the pool.

Minimum Qualification: First Aid at Work

5.2.2 Un-programmed session
In un-programmed sessions (recreational swimming – such as an end-of-term fun session) the unpredictable nature of children’s behaviour will be such that a higher life guarding standard will be required, on a par with normal public swimming pool supervision.

Minimum Qualification: RLSS National Pool Lifeguard Qualification
Un-programmed sessions should not be run unless an NPLQ lifeguard is in position, supported by teaching staff working as part of a lifeguard team to supervise predetermined zoned areas in line with the NOP for the pool. School staff should work under the direction of the qualified pool lifeguard.
5.2.3 Mixed programmed and un-programmed sessions
Where the pool is in shared use and clearly divided between programmed and unprogrammed swimming activities, suitably qualified staff may provide both the teaching and lifeguard cover – but only for the programmed area of the pool.

**Minimum Qualification: First Aid at Work**
Where shared use is not in defined areas then the standard of life guarding provision should be as for an un-programmed session.

**Minimum Qualification: RLSS National Pool Lifeguard Qualification**

5.3 Further Information on Lifeguarding Qualifications and Courses

**RLSS National Pool Lifeguard Qualification**
This is a course taken in two units. Unit 1 lasts a minimum of 31 hours and covers the principles of pool lifeguarding, water rescue skills, conscious and unconscious casualties, CPR skills and First Aid. Unit 2 is a practical assessment over a minimum of seven hours in a work-related environment. The course is offered at more than 2000 centres nationwide.

**RLSS National Rescue Award for Swimming Teachers and Coaches** is a two day course. This course covers class management, basic first aid and resuscitation as well as aquatic rescues likely to occur during programmed activity. The course is offered at seven centres. Details of both RLSS courses are available at [www.lifesavers.org.uk](http://www.lifesavers.org.uk).

**First Aid at Work** is the basic first aid course for fully-qualified first aiders in schools and other workplaces. It is normally taken as a four day course, with an assessment by examination on the final day. The course covers most aspects of first aid, including CPR and courses for schools organised by Worcestershire County Council also include an element of paediatric first aid to meet the requirements of early years work. First Aid at Work courses are available for Worcestershire County Council teaching staff from the INSET Office (telephone: 01905 740122/3/4/5) and for support staff from Children's Services Health and Safety (telephone 01905 766189).
6. QUALIFICATIONS FOR THE TEACHING OF SWIMMING

It is a strong recommendation that the class teacher accompanies the class to the pool for all swimming lessons in first and primary schools.

It is essential that provision is made for lifesaving, first aid and resuscitation cover in all school swimming sessions. If the pool provides a lifeguard, that lifeguard should hold a valid National Pool Lifeguard Qualification (NPLQ). This covers lifesaving, lifeguarding and first aid (including resuscitation) skills. If no lifeguard is provided alternative and satisfactory arrangements, in line with this policy document, must be made. This is likely to be the case at most school pools. (See paragraphs 5.2 and 5.3.)

Ideally the best qualified swimming teacher/instructor should teach the least able pupils. However this will need to take into account the ability of all staff in the team to effect a rescue (if necessary) at the depth of water at which they are working.

6.1 Swimming Instructors

- Specialist instructors of swimming will hold an Amateur Swimming Association (ASA) Primary School Teacher Certificate for the Teaching of Swimming, an STA Certificate in Teaching Swimming (Primary Teacher (STC[PT]) or Secondary Teacher (STC[ST]) as appropriate) or national equivalent as a minimum qualification.
- Where teaching specialist groups, additional qualifications may be required, for example, ASA Certificate for Teaching Swimming for People with Disabilities – Level 1 or 2 as appropriate to the group.
- If supervising an un-programmed session the teacher or instructor must hold a current RLSS National Pool Lifeguard Qualification (NPLQ).
- Swimming instructors should keep their qualifications updated.

6.2 School Staff

Any adult teaching swimming lessons must be competent to do so by virtue of experience or qualification. It is strongly recommended that staff undertake Module 1 of the ASA National Curriculum Training Programme – Short Course (seven hours) as a minimum. Nobody should ever teach swimming without at least one other person present to assist with first aid and rescues if necessary. The numbers and level of support will depend upon the circumstances.

6.3 Other Adults Assisting (Not Leading) the Teaching of Swimming

6.3.1 In school pools

Where an adult other than a teacher or swimming instructor assists with swimming they should be given a clear understanding of what is expected of them. The ASA “Helper Certificate for Adults Other than Teachers” provides basic technical knowledge, an awareness and understanding of some of the health and safety issues, and guidance in how best to assist the designated teacher of swimming. Taking this course could be a useful way for adults other than teachers to increase their experience and competence.

6.3.2 In public pools

Where an instructor of swimming has been provided, the role of the class teacher and other accompanying school staff will be to work collaboratively with that person, though the class teacher retains the ultimate responsibility for the safety of their pupils.
6.4 Induction for School Staff and AOTTs
All accompanying staff should have undergone an induction course, provided by the Pool Manager, on the NOP and EAP of the pool they are using and ensure that they are clear about the role they will be expected to play in an emergency. AOTTs should have undergone the same induction course for the pool’s NOP and EAP as the class teacher.

6.5. Records of Qualifications
Records of all qualifications of those involved in the teaching of swimming must be maintained, kept up to date and available for inspection if required. Records must be retained for a minimum of three years. The person responsible for this is the designated person in charge of school swimming.

6.6 Further Information on Swimming Teaching Qualifications and Courses
Amateur Swimming Association (ASA) qualifications and courses are available at an introductory level for teachers wishing to gain further experience or awards. ASA Helper Certificate for Adults Other than Teachers (6 hours) Designed to equip an adult other than a teacher with the skills required to assist the designated swimming teacher within the school swimming teaching programme.

- # ASA National Curriculum Training Programme – Module 1 (7 hours) Designed to equip qualified teachers and others to work under a specialist swimming instructor or holder of the Primary School Teachers Certificate to teach swimming.

- # ASA National Curriculum Training Programme – Module 2 (10 hours) Tops up the Module 1 course and equips staff to teach without additional supervision does not cover any rescue or lifesaving.

- ASA Primary School Teacher Certificate for the Teaching of Swimming (17 hours) Covers both of the above (Module 1 + Module 2) as a combined course.

- ASA Certificate in the Teaching of Swimming for Adults Other than Teachers (24 hours) To assist an ASA-trained teacher working with small groups.

- ASA Certificate for Teaching Swimming for People with Disabilities – Level 1 (27 hours) or Level 2 (38 hours) Specialised courses for working with the disabled.

Full details of the above courses are available online at www.britishswimming.org

# Introduction to Top Sport Swimming and the Swimming Component of the National Curriculum (4 hours) A theory-only course for familiarisation with TOPS resources. Courses marked # above are offered from time to time for staff of Worcestershire County. Council schools through the INSET Office (telephone: 01905 740122/3/4/5).
7. RISK ASSESSMENT
The pool, children and staff participating will all have unique features that make particular demands upon safety. Each pool and each session must therefore be dealt with individually.

7.1 Risk Assessment for Pool Users
Staff, usually class teachers, must undertake a written risk assessment, for the visit to the pool (including the journey to and from it) and the activities planned, as part of their lesson planning process. This will be monitored by the school’s swimming co-ordinator. It should be kept with the scheme of work and should include details of hazards, risk potential and control measures including supervision arrangements (on the journey, during changing and in the pool), lifeguarding, ratios for specific classes, groups or lessons and should take account of:

- the age and ability of the children in each class
- the activities they will be undertaking
- the qualifications of the people leading and supporting the session.

The risk assessment should be written before the swimming unit of work commences, though it may need to be revised in the light of experience. Any risks specific to individual children with special needs of any sort will be covered in class risk assessments. A variety of skills are required, stemming from an assessment of each child’s individual requirements. An on-going, unwritten risk assessment should be undertaken by individual members of staff, each time they attend the pool, to take account of the situation at that time and to take action to control any identified risks.

Pitcheroak School’s Swimming Risk Assessment is attached at the end of this document

7.2 Pool Risk Assessment for School Pool Providers
Where a pool is on a school site, the host school has a responsibility to undertake risk assessments: to identify the hazards that might be present at the pool to assess the potential for risk to identify measures to eliminate and control risks and take steps to implement them. Additionally, the host school is responsible to ensure that hirers, including other schools and other users, are aware of the risks identified and the steps required to control them. The control measures for risks (but not the risk assessment itself) will be included within:

- a Normal (safe) Operating Procedure (NOP)
- an Emergency Action Plan (EAP).

Copies of the NOP and EAP must be provided to all hirers. The host school must ensure that all visiting staff are clear about how the pool operates and the role they will have to play in any emergency. The visiting school’s swimming co-ordinator must:

- make a preliminary visit to become familiar with the pool and see how the NOP and EAP apply in context
- make the NOP and EAP available to all staff and AOTTs who are involved in school swimming sessions at the pool. (These should be re-issued to all hirers when they are reviewed but the school should check, annually, with the pool management that they have not changed.)
• record staff training in the implementation of the NOP and EAP. It is important that arrangements are made for a practical induction whenever new staff attend at the pool if the visiting school’s swimming co-ordinator changes, they must make a preliminary visit to become familiar with the pool and see how the NOP and EAP apply.

7.3 Pool Risk Assessment for Public Pool Providers
Where public pools are used regularly for swimming lessons the Pool Manager should provide the NOP and EAP to the school’s swimming co-ordinator, who must ensure that all visiting staff are clear about how the pool operates and the role they will have to play in any emergency. The school’s swimming co-ordinator must:

• make a preliminary visit to become familiar with the pool and see how the NOP and EAP apply in context
• make the NOP and EAP available to all staff and AOTTs who are involved in school swimming sessions at the pool. (These should be re-issued to all hirers when they are reviewed but the school should check, annually, with the pool management that they have not changed.)
• record staff training in the implementation of the NOP and EAP. It is important that arrangements are made for a practical induction whenever new staff attend at the pool
• If the school’s swimming co-ordinator changes, they must make a preliminary visit to become familiar with the pool and see how the NOP and EAP apply.
• The writing of NOPs and EAPs is considered further in section 10 and templates for them are given in Appendices B and C.

8. SWIMMING IN OTHER CONTEXTS
8.1 Hydrotherapy Pools
Water-based activity in hydrotherapy pools requires higher levels of supervision, often on a one-to-one basis in the water. These are not usually deep water pools and so, for teachers and physiotherapists, the First Aid at Work qualification is an appropriate qualification for life guarding the pool. Adults in the water are only able to supervise the young person they are assisting and should not be counted in the supervising ratios. The lifeguarding duties must be carried out by qualified people on the side of the pool. Physiotherapists should have completed a recognised professional course in managing hydrotherapy activities. A variety of skills are required stemming from an assessment of each child’s individual requirements. Schools with hydrotherapy pools should establish an apprenticeship programme for new staff to work with experienced staff before they take full responsibility for sessions. This induction can take place within or between schools.

8.2 Using Pools on Educational Visits
Where school parties use swimming pools as part of an educational visit the above conditions should still be applied. Use is likely to be of a recreational nature. A qualified lifeguard must be on duty and teachers must work with the lifeguard to supervise the session. They should not stand together, or sit talking on poolside but should actively work together as part of a team safeguarding all the children. If the pool has no lifeguard cover and the school is providing its own lifeguard, arrangements should be made to ensure sole use of the pool, so that other guests do not increase the numbers in the water. Lifeguarding qualifications should be to the same standard as for a similar activity in the school’s own or hired pool (see section 5). Where the lifeguarding duty is given to an appropriately qualified
student, the teacher will retain overall supervision responsibilities to guarantee appropriate levels of behaviour and adherence to pool rules.

8.3 Open Water – rivers, lakes, reservoirs, canals or the sea
Swimming and paddling or otherwise entering the waters of river, canal, sea or lake should never be allowed as an impromptu group activity. The pleas of young people to be allowed to bathe – because it is hot weather, for example, or after a kayaking exercise - should be resisted where the bathing has not been considered as part of the overall plan. Bathing activities should take place only when a specific risk assessment has been completed and control measures put in to reduce risks to an acceptable level. It is good practice that, wherever possible, group leaders seek out recognised bathing areas that have official surveillance i.e. qualified lifeguard cover. Even then, group leaders should be aware that young people may mingle with members of the public and be lost to view. Young people should always be in sight and reasonable reach of their supervisors.

The group leader should:
• be aware that many children who drown are strong swimmers
• ascertain for themselves the level of the pupils’ swimming ability
• check the weather
• be aware of the local conditions – such as currents, weeds, rip tides, a shelving, uneven or unstable bottom – using local information from the lifeguard, coastguard, harbourmaster, police or tourist information office
• beware of rocks, breakwaters and other potential hazards
• look out for warning signs and flags: a red flag means it is unsafe to swim; yellow flags mean that lifeguards are on patrol in the area between the flags; a black and white flag means it is an area used by surfers and not suitable for swimming
• designate a safe area of water for use by the group;
• brief the group about the limits of the swimming area
• avoid crowded beaches where it is harder to see young people
• be aware of the dangerous effects of sudden immersion in cold water
• be aware of the dangers of paddling, especially for younger children
• ensure that young people have not eaten (for an hour) before swimming
• ensure the activity is suitable for the young people, especially any with special needs or disabilities
• adopt and explain the signals of distress and recall
• ensure that buoyancy aids, lifejackets etc. are used where appropriate
• carry out regular head counts
• be aware that it is not always possible to tell when someone is in difficulties.

Supervisors should:
• have clear roles – at least one supervisor should always stay out of the water for better surveillance, even where lifeguards are on duty
• take up a best position from which to exercise constant vigilance
• divide their careful watching between staff who stand in the sea and look landward towards the group and staff who stay on land and watch the group from that vantage point
• give the young people their full, undivided attention
• always follow the advice or directions of a lifeguard
• never swim themselves unless it is to help a young person in distress
• not join in any of the games with young people
• advise young people to stay well within their depth
• be prepared to act immediately when a young person appears to be in difficulties
• ensure that young people leave the water immediately if they get too cold, especially if toes and fingers look blue or feel numb – could suggest the onset of hypothermia
• recognise that a young person in difficulty may not wave or shout – all of their energies could be focussed on trying to keep afloat.
• Jumping and diving, as from sea cliffs or gorge environments should be treated as a specialist adventure activity and be supervised accordingly only by a competent and qualified adventure activities leader. Supervising a low key activity next to deep water should receive extra consideration during the planning process and on the visit itself. (Refer to 2003 DfE and CCPR Water Margins document.)

The Outdoor Education Adviser Panel’s advice is that leaders should not supervise any open water bathing unless there is a qualified open water lifeguard on hand. For further advice contact the: The Royal Lifesaving Society UK, River House, High St, Broom, Warwickshire B50 4HN (Tel: 01789 773994) www.lifesavers.org.uk.

9 SWIMMING CLOTHING AND EQUIPMENT
Pupils should wear appropriate costumes for swimming that conform to safety, cultural and teaching requirements. It is important that swimming clothing is relatively tight fitting so as to minimise the effect of drag that water-logged clothing can create. Sensitivity is required to ensure: the correct balance when cultural demands require looser fitting garments the need to be able to see the movements that limbs and joints are making in the water to ensure appropriate learning. Pupils should not be excluded from swimming because of verrucae or similar foot infections. Swimming can continue provided a verruca sock covers the infected area.

9.1 Goggles
The use of goggles is generally to be discouraged, but some children who swim frequently or whose eyes are susceptible to irritation may ask to use goggles for swimming. Parents should be informed of their responsibility to teach their child to put on and take off goggles in the correct and safe fashion. The following paragraph would be a suitable insert in a letter to parents:

“Please ensure that goggles are of a good quality by only purchasing goggles that conform to British Standard BS 5883 (1996). Please read the manufacturer’s instructions for putting them on and taking them off. This is important to ensure protection of eyes from impact damage through stretching the eyepieces away from the face with wet fingers. You should be aware that on occasions your child will be asked to remove their goggles in order to perform certain aquatic activities safely.”

Goggles must be rinsed in pool water before use to prevent misting. Goggles must never be worn when diving, nor when the pool is crowded.
9.2 Jewellery
The wearing of jewellery whilst swimming is hazardous and must not be allowed, except where they cannot be removed for health, safety or religious reasons, when they must be made safe. This may mean taping over (for example) newly-fitted ear studs, medical bracelets or religious symbols, but staff must be aware that the usual tapes used for this purpose in PE lessons may come loose in water and a stronger, waterproof adhesive will be needed. If this cannot be achieved, the child may not be allowed to participate in swimming activities and may need to be given an alternative activity such as helping to evaluate the performance of other pupils.

10. POOL SAFETY OPERATING PROCEDURE (PSOP)
Schools with their own pools must undertake and regularly review their own risk assessments as a basis for determining safe operating procedures for their pool. From these they should write a Pool Safety Operating Procedure (PSOP) which can usually be divided into two parts:
- Normal Operating Procedure (NOP) to maintain safety in normal use
- Emergency Action Plan (EAP) detailing what everyone does if an emergency occurs.
These must be made available to other schools and hirers using the pool and must be reviewed and/or revised at least annually. Staff will need to be trained to follow the safety rules included in these procedures and should practice emergency procedures at the start of each term with the children in their classes. Staff training in the NOP and EAP should be recorded by the school, signed by the person giving the training and records kept for a period of at least one year. Schools using other schools’ or public pools will need to be aware of the pool’s NOP in order to ensure that they do what is expected of them to keep themselves and others safe and aware of the EAP to know what to do in an emergency. You must ask for copies of these documents before using the pool.

10.1 NORMAL OPERATING PROCEDURE (NOP)
Pitcheroak School’s NOP is part of a separate document that can be found on the school’s website under non-statutory policies. http://www.pitcheroak.worcs.sch.uk/

### Block Booking:
- Yes
- No

---

Block booking includes having the facility and time reserved as specified and are payable at every attendance unless otherwise advised.

Advance payments include a quarterly invoice, VAT except and payable 30 days prior to commencement.

(Cheques should be made payable to Redditch Borough Council)

I, the undersigned hereby apply to hire the facilities indicated above on the date and times given. I agree to the terms and conditions of hire and understand that signed confirmation of this application shall form a contract between myself (hирer) and Redditch Borough Council. I acknowledge receipt of the standard Terms and Conditions for hire of the facility.

**Signed (Hирer):** [Signature]  **Date:** 8/12/15

**Signed (Facility Manager):** [Signature]  **Date:**
Special conditions

Block bookings
1. The Facility Manager reserves the right to cancel a block booking at any time once payment has not been made. Conditions or Special conditions.

2. The hirer must give the council 7 days notice for all cancellations. A cancellation form should be completed and signed. Failure to give the appropriate notice will result in the hirer being charged for the court.

3. Changeover times between activities are included in the time of the block booking. Any time lost due to equipment being erected or dismantled cannot be carried forward to the next session. Changeovers will be actioned as efficiently as possible by Facility staff.

4. The hirer must ensure that their fellow players conduct is socially acceptable when attending the facility. Please note that swearing and spitting is not considered as socially acceptable behaviour named above.

5. The hirer must ensure that they and their fellow players wear the correct footwear when participating in sessions. Black soled footwear is prohibited for an indoor activity.

6. The hirer must ensure that they and their fellow players and spectators using indoor activities wear their activity area as soon as they enter the end of session close. The hirer must also ensure that they and their fellow players do not enter the activity area until the 40 minute close/sounds before their start time.

7. All persons are prohibited from entering identified storage areas either marked with yellow and black hazard tape or areas marked staff only.

8. The hirer must pay for all sessions before commencement of play. All sessions must be paid prior to or on the day of use, unless otherwise agreed by the Facility Manager. Any breach of this will result in the block booking agreement being terminated. The council’s credit/debit department will recover any amounts outstanding.

9. The council is only able to guarantee a block booking for a maximum of 12 months running from April to March.

10. The Facility Manager reserves the right to cancel any sessions in the interest of Health and Safety of its staff and persons using the facility. This may include unsuitable playing areas and maintenance and repair requirements. The Facility Manager will endeavour to advise customers as soon as possible.

11. The hirer of a block booking must make themselves and their fellow players aware of the location of fire exits, fire alarm points and fire assembly points within the facility. Further information on emergency procedures may be obtained from the Facility reception.

12. Fees and charges may be subject to an annual increase usually in April of each year.

13. The hirer can only use Block Booking Cards for the activity which they were originally purchased for. Cards may be used to block book sessions for the same activity at other facilities owned or managed by the council. e.g. Badminton block booking cards may not be used to book a 5 a side field sessions or vice versa at any other facility. Block booking cards cannot be used for an individual booking of any activity, e.g. Badminton block booking cards cannot be used to book badminton’s 5 a side or any facility.

14. The hirer must pay Advance payments in full within 30 days of the invoice being issued. Failure to pay by this date will result in the loss of the VAT being paid. Cancellations must be done prior to payment of the invoice. No refunds can be issued once payment has been made.

Standard Terms and Conditions for Hire of Facility
1. Definitions
1.1 The balance means the balance of the fee payable after the deposit.
1.2 The council means Redditch Borough Council of Town Hall Avenue, Redditch, WR10 1AH.
1.3 The deposit means 25% of the fee.
1.4 The fee means the sum shown over the page.
1.5 The facility means the facility shown over the page.
1.6 The Facility Manager means the manager of the facility.
1.7 The hirer means the person/organisation named over the page.
1.8 The period of hiring means the period shown over the page.
1.9 The purpose of the hiring means the purpose shown over the page.
1.10 The special conditions means the conditions set out in the Schedule of this agreement.
1.11 The standard conditions means the Council’s Standard Conditions of Hire a copy of which is annexed to the Agreement.

2. Definitions and Interpretation

In these Conditions:
2.1 ‘Terms defined in the agreement to which these conditions are annexed (The agreement) have the same respective meanings in these conditions.

2.2 Words importing one gender shall be construed as importing any other gender.

2.3 Words importing the singular shall be construed as importing the plural and vice versa.

2.4 References to persons include bodies corporate.

2.5 Any undertaking by the Hirer not to do an act or thing shall be deemed to include an obligation to use reasonable endeavours not to permit or suffer such an act or thing to be done by another person.

2.6 References to the facility are to the premises or the equipment and shall not be taken into account in its construction or interpretation.

2.7 Any reference to a specific statutory provision includes any statutory modification or amendment or re-enactment of such statutory provision and any regulations or orders made under such statutory provisions or statutory provisions.

3. Corporate Hirer

If the hirer is a corporate body the Hirer shall at the time of entering into the Agreement notify to the council in writing the name, address and telephone number of an individual who will be personally responsible to the Council for the obligations of the Hirer under the Agreement jointly and severally with the Hirer.

4. Deposit

The Deposit paid by the Hirer is non-refundable except in the case of cancellation by the Council in accordance with Condition 2.6.

5. Facilities

5.1 Use of the facility includes use of [Area of use to be supplied by the site Facility Manager].

5.2 The Hirer is to pay for additional facilities if any provided by the council other than the basic use of the facility in accordance with the scale of charges [copy of which has been supplied to the Hirer].

6. User

6.1 No part of the facility is to be used for any purpose other than the purpose of the Hiring as specified on the booking form.

6.2 No part of the facility is to be used for any unlawful purpose or in any unlawful way.

6.3 No animal (other than a guide dog) is to be brought into the facility or allowed to enter the facility without the consent of the council.

6.4 No additional seating, stands or other structures are to be brought into the facility without the prior written approval of the Facility Manager.

6.5 No explosives or highly flammable material or articles producing offensive or noxious colours or steam gas and any other vapours are to be brought into the facility.

6.6 No part of the facility is to be used for barbeques.

7. Electrical equipment

7.1 No lighting, heating, power or other electrical fittings or appliances in the Facility are to be altered moved or in any way interfered with.

7.2 No additional lighting heating power or other electrical fittings are to be installed or used without the prior consent of the council.
26. Further Exclusions of Liability
26.1 The Council will not be liable for any loss due to any breakdown of machinery, failure of supply of electricity, leakage of water, fire, government restriction or act of God which may cause the Facility to be temporarily closed or the hiring to be interrupted or cancelled.
26.2 The Council gives no warranty that the Facility is legally or physically fit for any specific purpose.

27. Right of Entry and to Monitor Use of the Facility
27.1 The Council reserves the right to have authorized members, officers, employees or agents of the Council to enter the Facility at any time for any authorized purpose.
27.2 The Facility Manager has the right to monitor the use of the Facility to enable them to keep accurate records of persons using the facility and also to enable them to make appropriate charges to the Hirer.

28. Cancellation by the Hirer
28.1 If the Hirer wishes to cancel the hiring in whole or in part, the Hirer must give the Council notice of that effect.
28.2 In the event of cancellation by the Hirer, the deposit is non-refundable.
28.3 If notice of cancellation is given by the Hirer less than 14 days prior to the Period of Hiring and if the Council is able to effect an alternative hiring then the Council will refund to the Hirer the balance but otherwise the Council will be entitled to retain the whole of the Fee.

29. Cancellation by the Council
29.1 The Council may cancel the hiring if the Facility is required for any purpose in connection with Parliamentary or local government election or emergency plans or if the Facility is rendered unusable by any such event as mentioned in Condition 26.1.
29.2 If the hiring is cancelled for any such reason as is mentioned in condition 29.1, the Council will give the Hirer maximum practicable notice and refund the Fee but will not otherwise be liable to the Hirer.

30. Breach by the Hirer
If the Hirer fails to observe and perform any of these Conditions the Council may:
30.1 charge to and recover from the Hirer any expenses incurred by the Council in remedying any such failure including the cost of employing attendants, workmen, cleaners or other persons as may be appropriate, and
30.2 cancel the instant or any other hiring of the Facility by the Hirer without incurring any liability to the Hirer for the return of any fee or otherwise.

31. Bankruptcy/Insolvency
31.1 The Council may cancel the instant or any other hiring of the Facility by the Hirer if the Hirer shall become bankrupt or go into liquidation. This is without prejudice to the rights of the Council in respect of any breach of this agreement.

32. Complaints
Any complaints arising out of the hiring must be made in writing to the Council within 3 days after the expiration of the Period of Hiring.

33. Council to Act by its Officers
The Council may act through any authorized officer and references in these Conditions to any approval discretion consent or requirement of the Council are deemed to be references to the approval discretion consent or requirement of any such officer and anything which the Hirer is required to produce to the Council is to be produced to such officer.

34. Notices
All notices, demands or requests by either party to the other shall be in writing and shall be sufficiently served if delivered by hand or sent by recorded delivery to the in writing and shall be served at the address of the Hirer specified in the Agreement in the case of a notice demand or request to the Hirer or to the Chief Executive of the Council at the Town Hall Alstonia Street, Redditch B98 8AH in the case of a notice demand or request to the Council.

Signed: P. POLI (Hirer)
Print: PAMELA POLI (Name)
Date: 8/12/15
10.2 EMERGENCY ACTION PLAN (EAP)

Pitcheroak School’s EAP is part of a separate document that can be found on the school’s website under non-statutory policies. [http://www.pitcheroak.worcs.sch.uk/](http://www.pitcheroak.worcs.sch.uk/)

11. POOL RULES

11.1 Rules for Pupils

The pool rules should be explained to all pupils before their first swimming lesson of the school year. They should also be reminded at the start of each term, ideally when the emergency procedures are tested and checked with pupils. Rules will need to be determined by local circumstances, but should generally include:

- never go onto poolside until a member of staff is present
- do not enter the water until instructed to do so
- no running on poolside
- no chewing gum or eating sweets or other food on poolside
- no shouting or whistling
- no jumping in or diving, except under instruction
- no pushing others in
- no holding others under the water or deliberately splashing them
- no jewellery to be worn
- no outdoor shoes on poolside
- to pay attention on one short blast of the whistle
- to leave the pool on one long blast of the whistle
- all instructions from staff to be obeyed promptly.

Pool rules may vary and a copy should be provided to schools using public pools or pools at other schools, together with the NOP and EAP, in advance of pool hire.

11.2 Rules for Staff

There are rules to ensure that lifeguards remain vigilant at all times. The following should also be practised by school staff supporting qualified lifeguards:

- never leave the poolside unattended
- keep alert and never turn your back on the pool or cease watching the pool when on duty. Move position every five minutes or so divide the area up into zones and constantly scan the area, counting heads, watching out for vulnerable or weak swimmers.

12. DIVING

Additional hazards are created when swimmers are allowed to dive into the pool. These need to be carefully managed. The teaching of diving should only be undertaken by an appropriately qualified teacher or swimming instructor. No diving shall be permitted in shallow water. A minimum depth of at least the fullreach height of the pupil (i.e. standing on the bottom of the pool with arms fully extended above the head) and never less than 1.5 metres depth of water and at least 7.6 metres forward clearance is required. The pool freeboard (height of poolside above the water level) must not exceed 0.38 metres. Only very flat horizontal dives (i.e. racing starts) should be taught in school swimming lessons and
then only if the teacher or instructor holds an ASA Teacher Certificate (or higher) and is fully conversant with the contents of the current ASA Teaching and Coaching Regulations. Looking to check for clear water immediately before diving must be taught and strictly observed. Prolonged swimming under water following a dive must be discouraged. Any diving blocks or stages must conform to Federation International de Natation (FINA)/ASA regulations.

13. POOL PLANT OPERATION AND POOL MANAGEMENT

13.1 In Public Pools
Schools are not required to check the qualifications of those managing the pool and plant at public pools that they use, but if there is any concern with regard to pool safety (including the clarity and quality of the pool water) this should be reported to the manager of the pool. If their concerns are not addressed satisfactorily within a reasonable time, they should contact the LA for advice (See section 16).

13.2 Record Keeping for Swimming
Records of incidents and accidents that occur in the swimming pool or pool area should be kept and made available at both venues. All the above records must be retained for a minimum of three years.

14. CONDITIONS OF HIRE

14.1 Pool operators cannot delegate responsibility for what happens in their pools, therefore if a school pool is hired to an outside organisation the school will need to ensure that the outside organisation will use the pool in a safe manner. Equally if a school hires a pool from someone else, that organisation will need to make sure that the school is supported in the safe use of the pool. The mechanism for this is initially the agreement to hire and any conditions of hire imposed by the organisation. The conditions will usually be re-enforced in the NOP and EAP. The agreement to hire should be reviewed at regular intervals. Whenever dates and times are confirmed these should be recorded in a signed agreement between the two parties. A simple standard form will suffice, but the hirers should also be given an up to date copy of the relevant NOP and EAP for the facility and any special conditions of hire which might apply to their session.

14.2 Conditions of hire should include:
- the name and address of the organisation hiring the pool
- the name and address of the pool being hired
- the name of the hirer’s representative (the responsible person - first point of contact) and contact details
- the activity for which the pool is to be hired (to assess the level of risk and safety rules required by session type)
- the numbers participating and their age and swimming ability (where a school hires a pool for a block involving more than one class with different abilities, ideally the form should be completed to show all this information as the equipment/area of the pool used may need to be different for different groups)
- specific agreement on the respective responsibilities of the hirer and the pool operator (for instance who will provide the lifeguarding and the level of life guarding provision to be made, child protection issues, staffing levels)
• details of who is to be responsible for what in the event of an emergency (normally it is the operator of the pool who is responsible for building related problems and the hirer for emergencies associated with the activities of the group)
• any safety advice to be given to swimmers and any specific rules that should be enforced
• a signature from the hirer that they have received and read copies of the NOP and EAP
• appropriate third party liability insurance

15. SAFEGUARDING CHILDREN (CHILD PROTECTION)
15.1 The LA and the school have their own child protection procedures and so too should the pool. It is important that the pool procedures relate to those of the LA. Each school and pool being used by the school should establish a protocol identifying the relationship between their respective procedures. Ideally this should be within the conditions of hire.

15.2 Each pool should have a designated person with responsibility for child protection who should liaise with the designated teacher in the event of any concern about a child. The name of this person at the pool should be publicised to school and public users in order that concerns can be reported to them.

15.3 All persons working with children should have an Enhanced DBS Disclosure.

15.4 Care should be taken in changing rooms to ensure that the appropriate ratios and gender of staff are present to supervise children and that children are safeguarded from members of the public – see section 4. Supervision should be appropriate to the needs and age of the young people concerned and sensitive to the potential for embarrassment.

15.5 When supervising children changing or assisting them with their swimming, pool and school staff and AOTTs should avoid physical contact with children unless it is:
• essential to develop a swimming skill or technique
• to treat an injury
• to prevent an injury
• to meet the requirement of the activity (e.g. lifesaving)
• to lift or manually support a child with disabilities.
In these circumstances the adult should also explain the reason for the physical contact to the child. Unless the situation is an emergency the adult should ask the child for permission. If children have disabilities they and their carers need to be involved in deciding what assistance should be offered and the child should be treated with dignity and respect. Where physical contact or support will need to be given to develop skills and technique, teachers should write to parents before the sessions start to explain that this may be necessary on occasions. This could be included with the general information that the school gives parents about swimming lessons.

15.6 When supervising children changing, adults should:
• avoid any visually intrusive behaviour
• announce their intention of entering the changing room
• avoid remaining in the room unless pupil needs require it.
• Adults should not:
• change in the same place as children
• shower with children.

15.7 Where children sustain an injury and any first aid is administered the parents/carers should be informed as soon as possible. Details should be recorded and retained by the school. Accidents and incidents which occur at a public pool should also be recorded by pool staff on their forms for their records.

15.8 In the event of a child needing to be taken to hospital for treatment, a representative from the school should always accompany the child. If this leaves the school group short of staff at the pool then the school should be informed to seek additional staffing for the group. The parent/carer of the child should be informed as soon as possible.

15.9 Staff and AOTTs should avoid placing themselves at risk by being alone with a child and should ensure that wherever possible there are other responsible persons around and that they are in public view.
